# Chapter 1

## Namespace Index

### 1.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

<a href="#">opt_neuron.run</a>	.....	7
<a href="#">opt_neuron.util</a>	.....	7

## Chapter 2

# Hierarchical Index

### 2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

metaclass	
opt_neuron.util.Message . . . . .	9
opt_neuron.util.CommandMessage . . . . .	9
opt_neuron.util.RetValMessage . . . . .	11
opt_neuron.util.StatusMessage . . . . .	12
ABCMeta	
opt_neuron.util.Message . . . . .	9
Enum	
opt_neuron.util.MessageType . . . . .	11
PriorityQueue	
opt_neuron.util.MessageQueue . . . . .	10

## Chapter 3

# Class Index

### 3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">opt_neuron.util.CommandMessage</a>	9
<a href="#">opt_neuron.util.Message</a>	9
<a href="#">opt_neuron.util.MessageQueue</a>	10
<a href="#">opt_neuron.util.MessageType</a>	11
<a href="#">opt_neuron.util.RetValMessage</a>	11
<a href="#">opt_neuron.util.StatusMessage</a>	12

## Chapter 4

# Namespace Documentation

### 4.1 `opt_neuron.run` Namespace Reference

#### Functions

- def `run` (sysargs)

#### Variables

- `shell` = None

#### 4.1.1 Detailed Description

This script will take the parameter and initialize the core and gui.

#### 4.1.2 Function Documentation

##### 4.1.2.1 `def opt_neuron.run.run ( sysargs )`

Parses the arguments and prints failure messages.  
Loads the config file, given by the argument `--config`. If this argument is not present, a file named `*conf.ini*` will be searched.  
The config is no parsed, the main queues are initialized and the core is loaded.  
If specified, the GUI will be loaded, too.  
This function waits for the core thread to join.

### 4.2 `opt_neuron.util` Namespace Reference

#### Classes

- class `CommandMessage`
- class `Message`
- class `MessageQueue`
- class `MessageType`
- class `RetValMessage`
- class `StatusMessage`

## Functions

- def [MESSAGE\\_FAILURE](#)
- def [MESSAGE\\_SUCCESS](#)

## Variables

- tuple **logger** = logging.getLogger(\_\_name\_\_)
- tuple **MESSAGE\_EXIT** = [CommandMessage](#)('CORE-EXIT', priority=-9001)

### 4.2.1 Detailed Description

Contains utility.

### 4.2.2 Function Documentation

#### 4.2.2.1 def opt\_neuron.util.MESSAGE\_FAILURE ( *msg*, *status* =None )

Returns a message which indicates that the previous command failed.  
Fancy output by Julian.

#### 4.2.2.2 def opt\_neuron.util.MESSAGE\_SUCCESS ( *msg*, *status* =None )

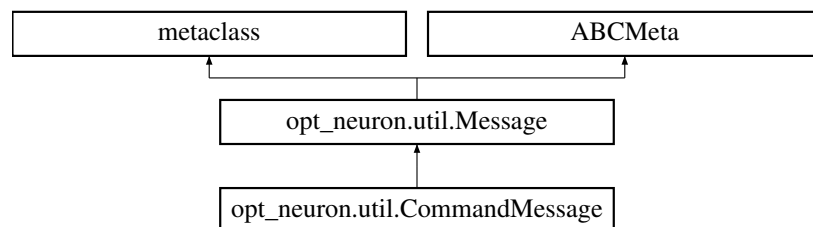

Returns a message which indicates that the previous command succeeded.  
Fancy output by Julian.

## Chapter 5

# Class Documentation

### 5.1 `opt_neuron.util.CommandMessage` Class Reference

Inheritance diagram for `opt_neuron.util.CommandMessage`:

#### Public Member Functions

- `def __init__`
- `def type` (self)

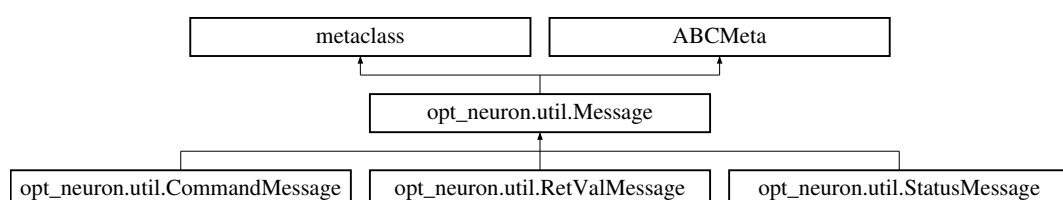

#### Additional Inherited Members

The documentation for this class was generated from the following file:

- `opt_neuron/util.py`

### 5.2 `opt_neuron.util.Message` Class Reference

Inheritance diagram for `opt_neuron.util.Message`:

## Public Member Functions

- `def __init__`
- `def type` (self)
- `def id` (self)
- `def priority` (self)
- `def content` (self)
- `def __repr__` (self)
- `def __eq__` (self, other)
- `def __lt__` (self, other)

## Public Attributes

- `content`
- `priority`
- `type`

### 5.2.1 Detailed Description

Message encapsulates a message.

A message has got a type (subclassed), an id, a priority and \ content, of course.

### 5.2.2 Member Function Documentation

#### 5.2.2.1 `def opt_neuron.util.Message.type ( self )`

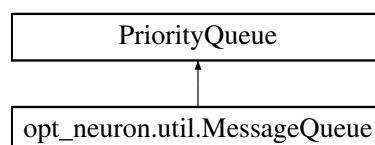

To be overwritten in subclasses. Should return a MessageType object.

The documentation for this class was generated from the following file:

- `opt_neuron/util.py`

## 5.3 `opt_neuron.util.MessageQueue` Class Reference

Inheritance diagram for `opt_neuron.util.MessageQueue`:

## Public Member Functions

- `def put`
- `def get`

### 5.3.1 Detailed Description

Adaption of the PriorityQueue class.

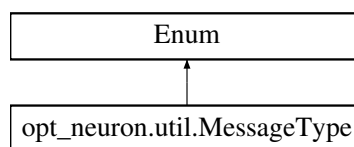

Only objects of type Message can be put in this queue as the name already suggests.  
Every sent message will be logged (Level: DEBUG)

The documentation for this class was generated from the following file:

- opt\_neuron/util.py

## 5.4 opt\_neuron.util.MessageType Class Reference

Inheritance diagram for opt\_neuron.util.MessageType:

### Static Public Attributes

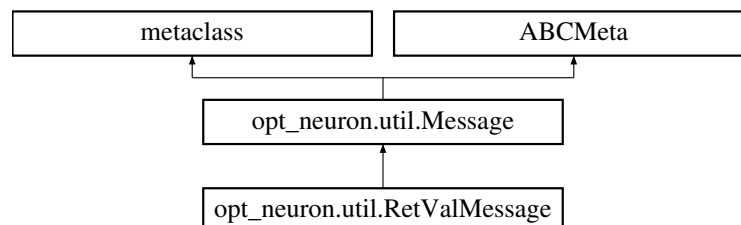

- int **STATUS** = 1
- int **COMMAND** = 2
- int **RETVAL** = 3

The documentation for this class was generated from the following file:

- opt\_neuron/util.py

## 5.5 opt\_neuron.util.RetValMessage Class Reference

Inheritance diagram for opt\_neuron.util.RetValMessage:

### Public Member Functions

- def **\_\_init\_\_**
- def **appendix** (self)
- def **cmd\_id** (self)
- def **type** (self)

### Additional Inherited Members

The documentation for this class was generated from the following file:

- `opt_neuron/util.py`

## 5.6 `opt_neuron.util.StatusMessage` Class Reference

Inheritance diagram for `opt_neuron.util.StatusMessage`:

### Public Member Functions

- `def type (self)`

### Additional Inherited Members

The documentation for this class was generated from the following file:

- `opt_neuron/util.py`
